

Work Experience Programs

One of the most important benefits of work experience is its potential to provide opportunities for young people to learn more about their own abilities.

We have partnered with local businesses to support young people to have the opportunity to gain work experience in a career of their choice.

We are also able to provide:

- Interview skills
- First impressions

Irrespective of how much young people have learnt at school, college or university, work experience imparts knowledge and skills that students might have never been exposed to while studying.
